

## Contacting your local Managing Contractor

### The Managing Contractor Model

The Managing Contractor model has been initiated by the Taskforce to ensure timely, professional delivery of projects expenditure in the 10 education regions in NSW over 24 months. A Managing Contractor has been assigned to each region, **responsible for assigning up to \$400m** and ensuring that all work in that region meets pre-set standards.

### Working with the Master Builders Association

In addition, the Master Builders Association has already collected the details of over 600 regional suppliers who can provide services locally to the Managing Contractors. We encourage all businesses in the trades and building industries to register their own interest and capability.
