Snowy Valleys REDS fire impact addendum  
May 2020

Regional  
NSW

# Executive summary

This document serves as a fire impact addendum to the Regional Economic Development Strategy (REDS) for Snowy Valleys. Its purpose is to identify potential short, medium and long-term focus areas for Local, State and Commonwealth Government to consider when prioritising industry and place-based economic recovery funding in response to the 2019-2020 bushfire crisis.

This document was developed in collaboration with Regional Directors and Local Government Area (LGA) representatives, and utilised input from fire affected engine industry experts. The priorities within this document were identified and are owned by Local Government.

The original REDS for Snowy Valleys highlighted a number of industries such as forestry, horticulture, viticulture and tourism, as core to the regional economy. The direct fire impact within this Functional Economic Region (FER) is quite extensive to both property and to industry. For example, forestry has had approximately 50% of plantation burnt, horticulture has lost approximately 25% of fruit trees, viticulture has had entire 2020 production lost to some taint. and tourism has lost both assets such as Selwyn snowfields, and revenue due to tourist evacuations and ongoing perception issues.

Example priorities to address fire impact identified in this document relate to, but are not limited to, support to restructure forestry industry, infrastructure investment, industry skills and transition support, and diversification and professionalisation of the tourism industry.

These materials are based on preliminary data available as of May 2020.

## Note to reader: COVID-19 context and considerations

This document has been prepared in response to the 2019-2020 bushfire crisis. **It does not factor in the economic impacts from COVID-19, providing only a bushfire economic impact baseline. As a result: this document and any impact estimates within do not take into account any additional economic impacts which arise from COVID-19 and consider only the economic impact of bushfires.**

In response to COVID-19 the Commonwealth and NSW Governments have put in place restrictions on business trade and personal movement to combat the spread of disease. It is anticipated that these restrictions will further impact regional economies and industries.

The timing of short/medium/long-term priorities and initiatives outlined in this addenda have been adjusted for COVID-19 restrictions known as at May 2020. This includes delays to tourism recovery initiatives such as marketing campaigns. As the length and impact from COVID-19 becomes clearer, the timing of some initiatives may need to be adjusted further.

Any measures put in place by the Commonwealth and NSW Government to support businesses and industries in response to bushfire impact should be viewed in the context of broader recovery measures.

## Impact summary

- 1 Fire within Snowy Valleys has affected economy engine industries
- 2 Up to 50% of plantation forests have burnt, limiting future available fibre for processing and manufacturing industry
- 3 Horticulture industry has lost approximately 20% of fruit trees, vignerons' had 2020 harvest impacted by smoke taint and significant impact to blueberry harvest
- 4 Tourism industry immediately impacted by tourist evacuations, with disrupting damage to key assets e.g., Selwyn snowfields destroyed

## Key takeaways

- 1 Ability to deliver REDS strategic priorities significantly impacted, particularly forestry and horticulture in the medium to long term
- 2 Immediate support required to sustain tourism industry in the short term

# Recap: Snowy Valleys REDS

## Regional endowments

- 1 Natural resource endowment
- 2 Forestry and timber processing infrastructure
- 3 Snowy Hydro Infrastructure
- 4 Location
- 5 Snowy Mountains Highway
- 6 Healthcare infrastructure and services
- 7 Forestry sector specialists
- 8 Aboriginal heritage

## Regional Specialisations

- Forestry and wood product manufacturing
- Agriculture
  - Sheep, beef cattle and grain farming
  - Fruit and tree nuts
- Electricity generation
- Tourism

## Strategic Priorities

- Support the growth of the forestry and timber processing and agriculture through improving access to and reliability of infrastructure and utilities

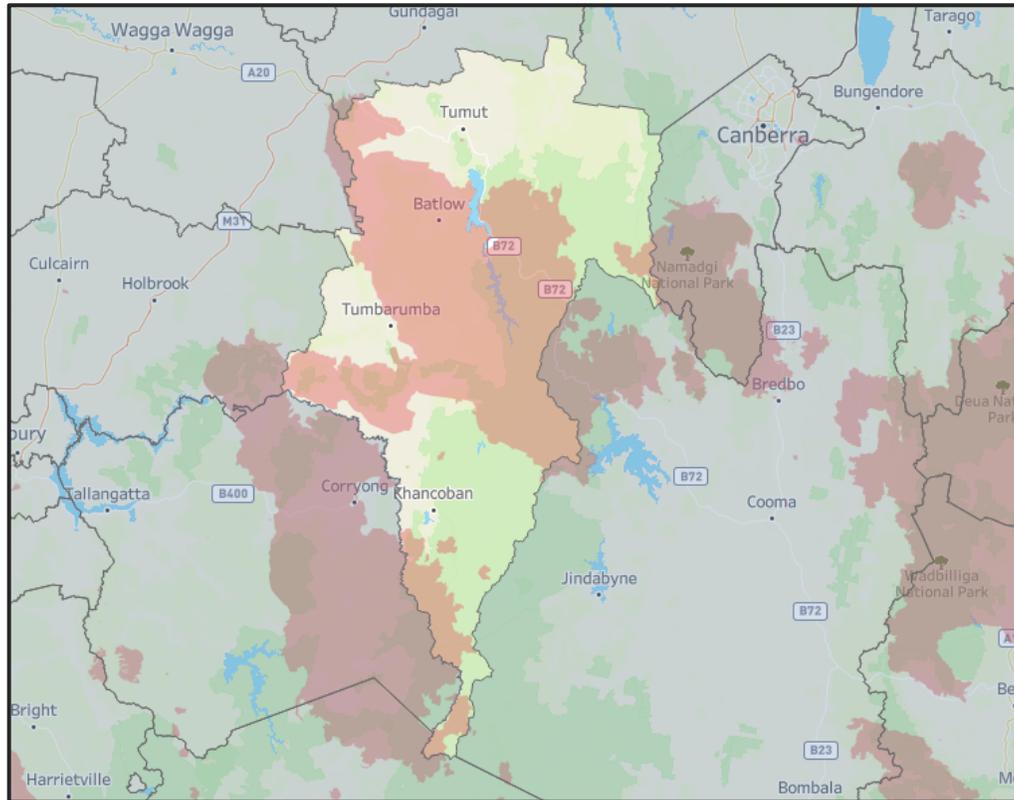

- Continue to develop and grow the tourism sector to diversify the region's economy

- Boost and sustain the supply of skilled workers for the region's core industries with regional skills development and initiatives to attract new residents

# 4,293 km<sup>2</sup> of the FER is physically impacted by fire, approximately 48% of the entire FER

## Fire impacted area within Snowy Valleys FER

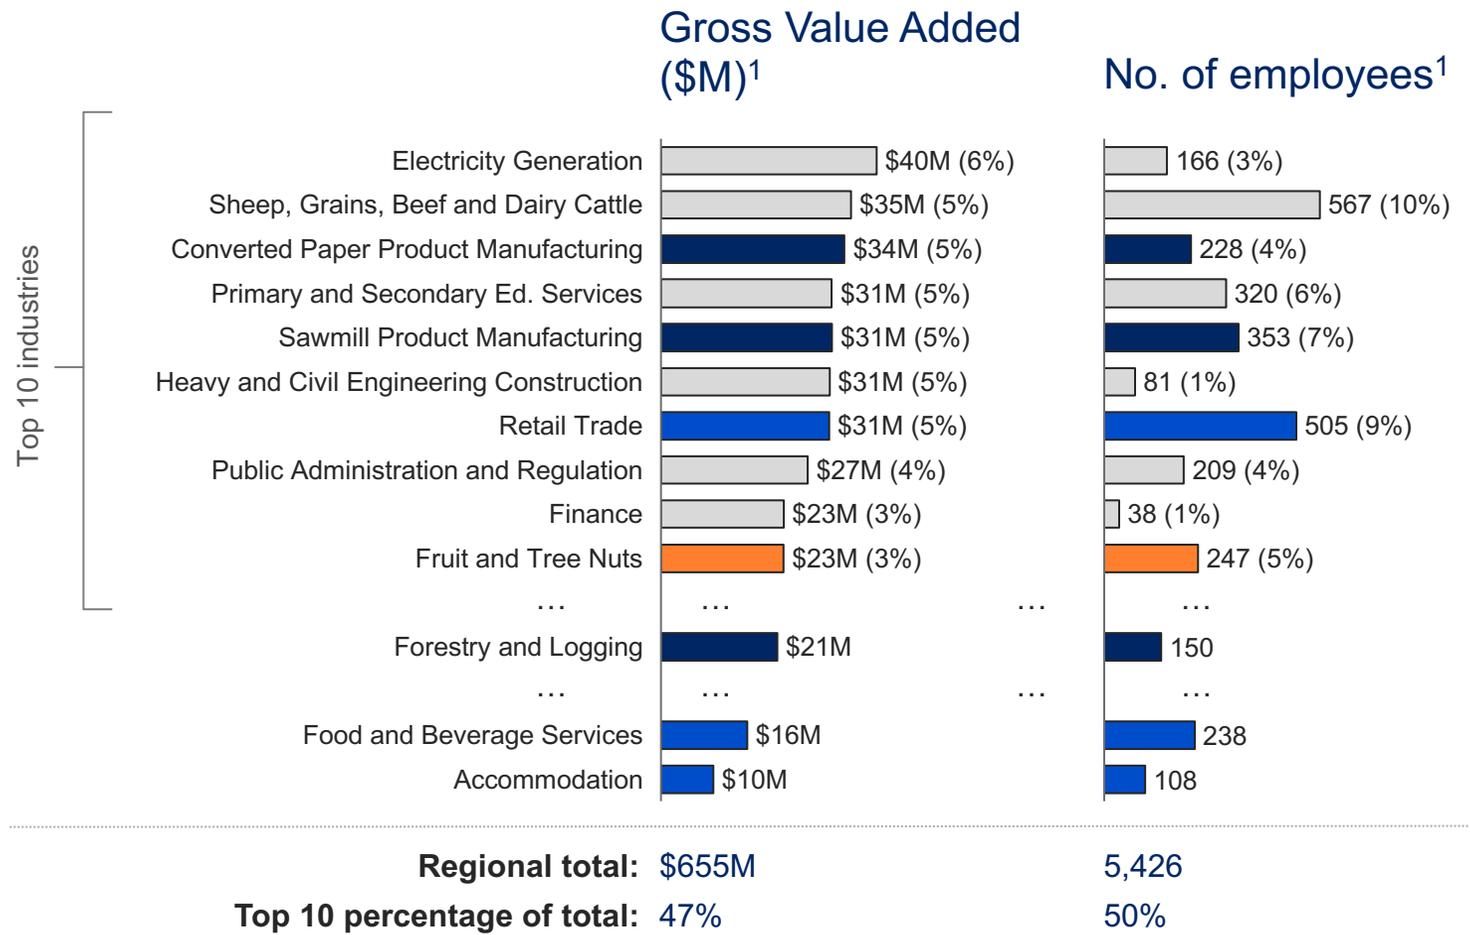

Fire affected area LGAs within FER: Snowy Valleys

## Key physical impacts

- **Area burnt<sup>1</sup>**: 4,293 km<sup>2</sup> burnt by bushfires (48% of total FER area—8,959 km<sup>2</sup>)
- **Property damage<sup>2</sup>**: 1,074 properties damaged or destroyed<sup>2</sup>
- **Forestry<sup>3</sup>**: Estimated 30,000 hectares of state forest and 17,000 hectares of private forest damaged
- **Horticulture<sup>4</sup>**: ~25% of apple trees damaged, picking worker accommodation destroyed, and significant impact on blueberry harvest
- **Viticulture<sup>5</sup>**: 2020 harvest lost to smoke taint, approximately 2300 tonnes valued at ~\$7.3M

# Snowy Valleys economy highly exposed to industries impacted by bushfires, especially forestry-related industries

## Impacted focus industries

- 1 Forestry:** Snowy Valleys relies heavily on industry located along forestry value chain, accounting for ~\$95M (22%) GVA and 15% employment
- 2 Fruit and Tree Nuts:** Significantly affected by bushfires, \$23M GVA and 5% employment
- 3 Tourism:** Tourism is broadly a subset of tourism-related industries such as Retail Trade, Food and Beverage Services, Accommodation etc; CERD analysis indicates that tourism contributes \$35M in GVA and ~6% of FTE employment

Also reliant on viticulture tourism and engine industry business tourism (e.g. forestry and tourism)

# Snowy Valleys focus areas require restructuring to respond to fire impact

## Strategic Priorities

▫ Support the growth of **forestry and timber processing and agriculture** through improving access to and reliability of infrastructure and utilities

▫ **Boost and sustain the supply of skilled workers** for the region's core industries with regional skills development and initiatives to attract new residents

▫ Continue to develop and grow the **tourism sector** to diversify the region's economy

## Degree of impact

Very High

High

Medium

## Restructured priority focus areas

▫ Given magnitude of impact to softwood plantations suggest focus should be adjusted

- Support salvage efforts and viability of remaining industry
- Consider options to adapt industry, industry skills and underlying endowments given significance of forestry pre-fire

▫ Priority is not directly affected, but could be indirectly impacted if skilled forestry workforce exit region

- Consider how to transition appropriately given evolving skill requirements from re-adjusting forestry industry and recovery effort (*e.g., construction skills, Snowy 2.0 opportunities and retraining tourism employees*)

▫ Tourism impact is short/medium term

- Address short-term perception issues around safety
- Support tourism operators to continue operate through downturn
- Continue to develop and diversify tourism, creating a more resilient regional economy
