

State Rescue Board of NSW

Accredited Rescue Units: General Land Rescue, Road Crash Rescue, Vertical Rescue, Flood Rescue and Marine Rescue.

The State Rescue Board of NSW's principal function is to ensure the maintenance of efficient and effective rescue services throughout the State. The Board is generally responsible for the development and promulgation of rescue policy, the setting, promulgation and monitoring of standards of training, and for providing advice on equipment levels for all rescue units in the State.

The Board is also responsible for recommending to the Minister the accreditation of units to undertake those forms of rescue for which the Board has decided that accreditation is required. Under section 54 of the *State Emergency and Rescue Management Act 1989*, accreditation of rescue units requires the approval of the Minister for Emergency Services.

This page is progressively updated as applications for accreditation and applications for deregistration are approved by the Minister.

General Land Rescue (GLR)

These units are trained and equipped with all the necessary skills and competencies to carry out Industrial and Domestic Rescue, Urban Search and Rescue Category 1 and Road Crash Rescue. A GLR unit is the most appropriate accredited rescue resource to respond to an incident as it is equipped to carry out all forms of GLR and in some cases has the capacity to undertake other specialist rescue.

Road Crash Rescue (RCR)

These units are trained and equipped to carry out RCR in rural, regional and remote areas of NSW.

Vertical Rescue (VR)

These units are specifically trained and equipped with appropriate equipment to carry out vertical rescue operations.

Flood Rescue (FR)

Flood Rescue Units are units that have been endorsed by the Minister as meeting current SRB accreditation standards for flood rescue.

Flood rescue means all rescue activities in a relatively high water level which overtops the natural or artificial banks of any part of a stream, river, estuary, or dam, and/or local overland flooding associated with drainage before entering a water course, and/or coastal inundation resulting from super-elevated sea levels and/or waves overtopping coastline deficiencies. Flood rescue involves the employment of intervention methods requiring specialist skills, techniques and equipment to locate, access, stabilise and extricate persons. There are five levels of Flood Rescue:

- Flood Rescue Awareness
- Land Based Flood Rescue
- On Water Flood Rescue
- In Water Flood Rescue
- Over Water Flood Rescue.

Accreditation is required for On Water Flood Rescue and In Water Flood Rescue and applies to all agencies involved in Flood Rescue.

On Water Flood Rescue

Using a powered vessel to reach the person where there is low likelihood of the operator entering the water.

In Water Flood Rescue

Entering the water to reach the person by swimming or using a raft or unpowered craft to reach persons. On these crafts there is a high likelihood of the operator entering the water.

Marine Rescue (MR)

Marine Rescue means a rescue performed on open, enclosed or inland waterways where there is a threat.

NSW Police Force

The NSW Police Force is responsible for the overall co-ordination of marine search and rescue operations in NSW. The NSW Police Force Marine Area Command is responsible for this function.

Marine Rescue NSW

Marine Rescue NSW is the recognised provider of volunteer marine rescue services in NSW and maintains accredited Marine Rescue Units along the NSW coastline and at key inland waterways.
