

# Masterbrand

## Quick reference guide

---

Version 1.2

November 2024

Go to [nsw.gov.au/branding](https://nsw.gov.au/branding) for the full brand guidelines.

# Logo

## Our primary logo

Made up of the Waratah icon and the full NSW Government wordmark, our primary logo should be used in most cases, where size permits.

## Small use logos

Two small-use logos are available to ensure legibility at all sizes. Guidance on when to use these logos is available in the brand guidelines.

## Clear space

We use a clear space that is 100% of the width of the 'N' across all applications (except when used in app icons, or social media profiles).

## Logo dos

- Ensure the logo is placed on backgrounds that allow for sufficient contrast and legibility.
- Ensure the logo has sufficient clear space.
- Ensure the appropriate sized logo is used for your application.

## Logo don'ts

- Place the logo on busy or patterned backgrounds.
- Separate, stretch, rotate, change the scale or colour of any of the logo elements.

# Typography

## Our primary typeface

Public Sans is a free, open source typeface, to be used in all communications, that makes information clear and easy to read.

The Public Sans family is available in 8 weights and two styles (roman and italic).

## Alternative typefaces

Where Public Sans is not available, our alternative typeface is Arial.

When translating content, if Public Sans does not support a language, choose the most accessible and appropriate typeface available for that language.

# Descriptors

Descriptors replace our previous agency lockups and can be used in communications where it is important for a customer to identify a department or agency within NSW Government.

They should only be used where there is a strong customer need.

Depending on the application, descriptors may be decoupled or coupled with the NSW Government logo.

Guidance on descriptor sizing, colouring and positioning is available in the brand guidelines.

# Colour

Within the masterbrand category the system can flex for both corporate and non-corporate communications and is dependent on how strong the association to NSW Government is and the type of communication.

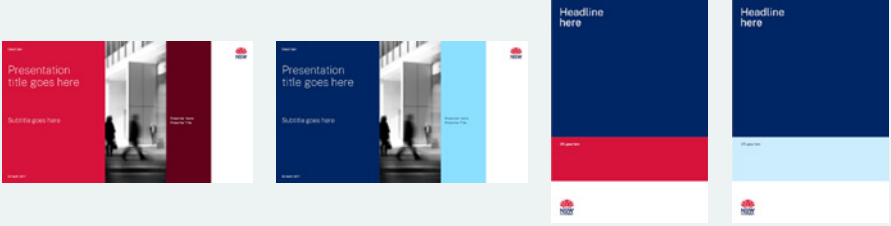

## Corporate palette

Grey 01	Blue 01 C	Red 01
Grey 02	Blue 02	Red 02 C
Grey 03	Blue 03	Red 03
Grey 04	Blue 04	Red 04

The corporate palette is built around the colours of our logo and creates a strong visual connection to our brand.

Use this palette for communications that require a strong association with the NSW Government. For example, corporate communications such as agency websites, stationery, annual reports etc.

Example colour application

## Non-corporate palette

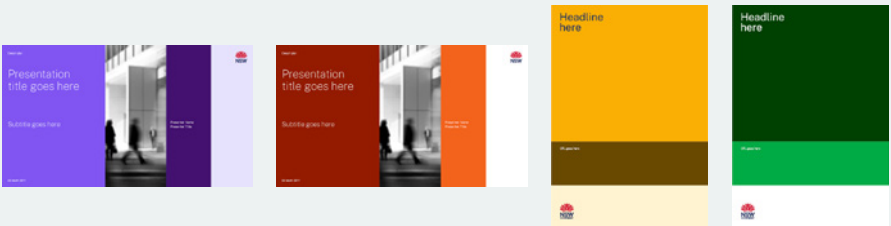

Grey 01	Green 01	Teal 01	Blue 01 C	Purple 01	Pink 01	Red 01	Orange 01	Yellow 01	Brown 01
Grey 02	Green 02	Teal 02	Blue 02	Purple 02	Pink 02	Red 02 C	Orange 02	Yellow 02	Brown 02
Grey 03	Green 03	Teal 03	Blue 03	Purple 03	Pink 03	Red 03	Orange 03	Yellow 03	Brown 03
Grey 04	Green 04	Teal 04	Blue 04	Purple 04	Pink 04	Red 04	Orange 04	Yellow 04	Brown 04

For non-corporate communications, we have access to the wider colour palette.

This palette has been created to accommodate a wide variety of subject matters and communication, under a consistent system.

Use this palette when greater expression and flexibility is needed. For example, programs, products and campaigns.

Example colour application

Refer to the brand guidelines for guidance on how to apply colour correctly and choose accessible colour combinations.

# Grid and layout

## The grid

A flexible 12 x 12 grid is the framework for all our visual elements and typography. No matter the application, the grid gives you the necessary structure and guidance so you can focus on your creative idea.

The grid can be constructed with and without margins and gutters, and can be divided to create simpler 2, 3, 4 and 6 column configurations to suit your application.

Guidance on how to construct and use the grid is available in the brand guidelines.

## Line system

Hairlines and bands can aid in the structure and organisation of content. They can be used in combination with each other as well as, vertically or horizontally.

Hairlines define boundaries or segment information and can be fully extended or dynamic to content.

Bands bleed and can be used to highlight information, add colour or hold photography or illustration.

# Iconography

## System / UI icons

We use Google's open source library for our UI icons. These icons are available in different styles and can be downloaded at <https://material.io/icons/>.

## Pictograms

Our pictograms can be represented in four different ways: line, line with accent, fill and fill with accent.

Guidance on creating bespoke or choosing ready-made pictograms are available in the brand guidelines including style, colour and usage.

## App icons

There are two different approaches that can be used for app icons, depending on how closely associated the app needs to be with NSW Government.

### 1. Standard icons

This is our default approach and should be applied in the majority of circumstances.

Guidance on how to create these icons are available in the brand guidelines.

### 2. Waratah icons

The Waratah Only logo can be used when an app requires a strong association with NSW Government.

# Illustration

## Principles

Our illustration principles define our overall approach and perspective to illustrations across our brand:

**Vibrant, human, diverse, meaningful, clear and uniquely NSW.**

We might not always tick all of these boxes, but these overarching ideas help define what fits within our style, and what doesn't.

## Illustration style

To ensure our communications are both appropriate and engaging we have a flexible approach to illustration.

While there is no single illustration style, they utilise our colour palette create cohesion across communications.

Below are a few examples of some different approaches.

Keyline

Flat colour

Realistic

Hand drawn

Geometric

Modular

Isometric

3D

# Photography

## Photographic approach

The following principles will help guide us in capturing content that reflects the lived and shared experiences of our people and places.

### True to place

Our photography shows real landscapes and Australians in their environment to highlight the genuine nature and character of NSW.

### Expressive diversity

Our photography showcases the full spectrum of NSW through diversity in perspective, subject, and visual tone.

### An editorial approach

Our photography captures meaningful experiences and interactions in a way that is considered, striking and memorable.

## Photography don'ts

- Do not choose images that feel unnatural, clearly staged, overly stock or cliché.
- Do not choose imagery that is not of NSW.
- Don't over-treat images or apply filters that feel unnatural, e.g. over-exposing, coloured effects.
