

This map has been compiled from hydrographic surveys carried out on behalf of the Environment Protection Authority to identify submerged flood debris following the storms and floods of 2021 and 2022. The bathymetry shown hereon is a by-product of these surveys and should be regarded as indicative of available depths only at the time of the survey. Transport for NSW and the Environment Protection Authority cannot guarantee the accuracy, currency or completeness of the data and does not accept responsibility for any consequences arising from its use. This map is not intended to be used for navigational purposes. The use of the information on this map is at the users' own risk.
